

# AgFIT Program

Reduce energy costs with lucrative irrigation automation incentives and dynamic pricing customized for growers

**Automation.** Incentives up to \$150 per HP help pay for technology to improve operations and reduce costs.

**Bill Savings.** Savings for irrigating when power is least expensive. Never pay more in the program than on your original tariff.

**Easy.** Intuitive app makes it easy to plan schedules in response to straightforward hourly prices published a week in advance. No demand charges. No penalties. No clawbacks.

**Flexible.** Use irrigation technology provided by Polaris, your preferred vendor, or none at all. Automated, remote/manual, or fully manual.

*"Our irrigation guys were actually pretty skeptical about using it at first. And then later down the line, they're just like: 'Oh, we like that a lot better.' We probably saved 30-40% on labor."*

Patrick Pinnard,  
Terranova Ranch

*"If we can save 10-20%, that's huge."*

Todd Ayerza,  
Campos Brothers Farms
